-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 July 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Applicant's election with traverse of invention III in the reply filed on July 25, 2007 is acknowledged. The traversal is on the ground(s) that prosecuting claims 1-5 in addition to the elected claims 6-19 would not complicate the action or unduly burden the Office. This is not found persuasive because the claims of the different inventions are significantly different and would involve different searches.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-5 and 20-26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on July 25, 2007.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 6-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Disclosure in view of Arenson et

al. (6,304,769). Applicant, in paragraphs [0003] to [0006] of the specification, admits that a catheter for treating a vessel occlusion wherein the catheter has a distal tip and an energy source connected to the distal tip is prior art. This disclosure fails to include a sheath and a magnetically active element located proximate the distal tip of the catheter body (claim 6) or forming a portion of the distal tip of the sheath body (claim 7). However, Arenson et al. teach that a magnetically active element should form a portion of the distal tip of a catheter (col. 6, lines 19-41) in order to obtain the advantage of steering the catheter in the body. It would have been obvious to use such magnetically active element in a catheter such as a guide catheter (i.e., the claimed sheath) to guide the catheter of the admitted prior art so that it too would have this advantage.
